PROFILE

Computer Science student at BINUS University specializing in Database Technology, with academic project experience in database systems, data analytics, data engineering, artificial intelligence, web development, and UI/UX. Experienced in collaborative projects involving data processing, ETL, statistical analysis, machine learning, system modeling, and digital product prototyping. Interested in gaining practical experience through an internship in data, database, software, or technology roles.

EDUCATION

BINUS University

Bachelor of Computer Science — Database Technology

Expected Graduation

Jakarta, Indonesia

Sep 2024 - Present

2028

TECHNICAL PROJECT EXPERIENCE

SafeCredit — P2P Lending Risk Assessment System

Python • FastAPI • Logistic Regression • LightGBM • Explainable AI

- Developed an academic fintech web prototype for borrower credit-risk assessment in a peer-to-peer lending context.
- Implemented Logistic Regression as the primary classification model and LightGBM as a validation model.
- Contributed to an explainable AI and smart auto-restructuring concept for transparent risk assessment.

Adidas US Sales Data Analytics

Python • Pandas • NumPy • Matplotlib • Seaborn • SciPy • Scikit-learn

- Cleaned and prepared a 9,641-row retail sales dataset for exploratory and statistical analysis.
- Performed exploratory data analysis, correlation analysis, ANOVA, and linear regression to examine sales relationships.
- Achieved an R^2 of 0.8398 in the regression analysis and translated findings into business insights.

Implementasi ETL untuk Analisis Data Penjualan Video Game

Pentaho Spoon • ETL • MySQL • Power BI

- Designed an ETL workflow to transform raw video game sales data into structured analytical data.
- Applied extraction, transformation, and loading processes using Pentaho and MySQL.
- Created Power BI visualizations to communicate sales patterns and support data-driven analysis.

AI Smart Street Lighting

Artificial Intelligence • Machine Learning • ID3 Decision Tree • LDR • DHT11/DHT22

- Developed an AI-based smart street lighting concept that adjusts light intensity according to environmental conditions.
- Applied an ID3 Decision Tree approach using light and environmental sensor inputs to support automated decisions.

Payroll PDM — Program Design Methods

UML • System Modeling • Use Case Diagram • Activity Diagram • Figma

- Modeled a payroll automation system using UML-based analysis and functional modeling techniques.
- Created use case and activity diagrams to represent system requirements, workflows, and user interactions.
- Designed a supporting interface prototype in Figma.

Tryvel — HCI Travel Application

HCI • UI/UX Design • User-Centered Design • Prototyping • Usability Testing

- Developed a travel application concept through a human-centered design process from user needs and ideation to prototyping.
- Designed interface flows and prototypes and incorporated usability testing into the HCI process.

Adidas US Sales Data Visualization

Tableau • Python • Pandas • Data Visualization

- Developed visual analyses of Adidas US sales data using Tableau and Python.
- Created visualizations covering regional sales, monthly sales trends, product breakdown, and sales-method composition.

ACHIEVEMENTS

- 28th Place — The 2025 ICPC Asia Jakarta-Indonesia National Contest
- High Honor — The 2025 ICPC Asia Jakarta-Indonesia National Contest
- Participant — The 2025 ICPC Asia Jakarta Onsite Regional Contest
- Silver Medal — Olimpiade Sains Pra KSN-K (OSAK) 2022, Mathematics
- Silver Medal — Olimpiade Sains Pra KSN-K (OSAK) 2022, Biology

TECHNICAL SKILLS

Data & Database: MySQL, SQL, Database Systems, Data Modeling, Data Analytics

Programming & Web: Python, C, PHP, HTML, CSS, JavaScript, Laravel, FastAPI

Data Engineering: Pentaho Spoon, ETL, Data Engineering, Cloudera

BI & Data Tools: Power BI, Tableau, R/RStudio, RapidMiner, Google Colab, Scikit-learn, Pandas, NumPy

UI/UX & Design: Figma, User Flow, Wireframing, Prototyping, Interface Design, Usability Testing

Other Tools: GitHub, Visual Studio Code, JMeter, QGIS

LANGUAGES & CORE STRENGTHS

- Languages: Indonesian (Native), English (Conversational)
- Core Strengths: Teamwork & Collaboration, Analytical Thinking, Problem Solving, Communication, Continuous Learning
